

## Koppelingen Serie CI.S-B-A

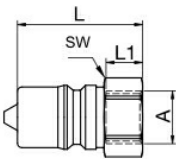

|                   |                                                                                         |
|-------------------|-----------------------------------------------------------------------------------------|
| Constructie       | Koppelingsbussen en koppelingsstekkers, aan beide zijden afsluitend, ISO 7241-1 Serie B |
| Materialen        | Huis, ventiel en stekker Messing, Veer roestvast staal 1.4310, Afdichting FKM           |
| Medium            | Gassen en vloeistoffen, die de gebruikte materialen niet aantasten                      |
| Mediumtemperatuur | -20...+125°C                                                                            |
| Bedrijfsdruk      | zie tabel                                                                               |
| Doorstroming      | zie Doorstroomdiagramma                                                                 |

### CICS-F Koppelingsbus - Binnendraad

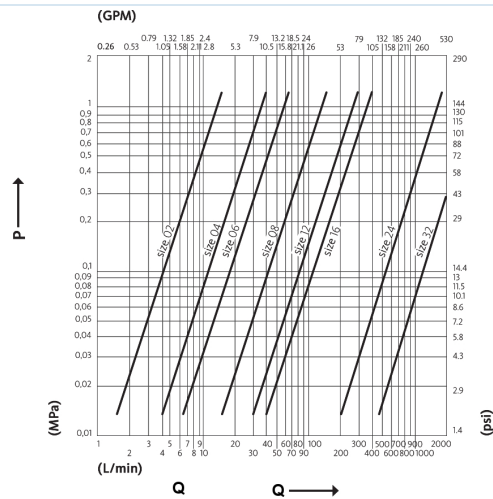

|  | A     | DN [mm] | Maat | D  | L    | L1 | SW | max. Bedrijfsdruk [bar] | Doorstroming [l/min] | Gewicht [g] | Type            |
|------------------------------------------------------------------------------------|-------|---------|------|----|------|----|----|-------------------------|----------------------|-------------|-----------------|
|                                                                                    | G1/8" | 3,2     | 02   | 23 | 50   | 9  | 18 | 220                     | 6                    | 85          | CICS1/8-F18-B-A |
|                                                                                    | G1/4" | 6,3     | 04   | 28 | 56   | 13 | 19 | 200                     | 16                   | 108         | CICS1/4-F14-B-A |
