

Stainless steel ball valves with pneumatic rotary actuator

Series BA364

Design type	Ball valve: Shut-off valve with floating ball, full bore passage, antistatic version, Compensation hole Actuator: piston actuator with 2 opposed pistons, elastic sealing, actuator in all details in accordance with ISO 5211 or according to NAMUR recommendations, End positions adjustable on both sides $\pm 5^\circ$
Function	available in double-acting or single-acting Version
Connection	RP1/4" ... RP4" according to ISO 7/1
Materials Standard version	Ball valve: Body and ball stainless steel 1.4401, PTFE-carbon-graphite reinforced, Spindle seal PTFE-carbon-graphite reinforced/EPDM Actuator: Hard anodized aluminium, Pinion, nickel-plated steel, Piston guide POM, Seals NBR
Application range	Fluids and gases of group 1 and 2 in accordance with PED 2014/68/EU that do not attack the materials used.
Medium temperature	$-40 \dots +160^\circ\text{C}$
Ambient temperature	$-20 \dots +85^\circ\text{C}$
Operating pressure	0 bar up to Operating pressure according to table and pressure-temperature diagram, suitable for rough vacuum
Control medium	filtered and lubricated or non-lubricated compressed air
Control pressure	5,5 ... 8 bar, Adaptation to lower pilot pressures possible on request
Mounting type	Installation in rigid piping system
Mounting position	any
Approvals	Ball valve: ATEX EX II 2G Ex h IIC T6 ... T1 Gb / II 2D Ex h IIIC T85°C ... T450°C Db, TA-Luft, SIL3 Actuator: SIL3
Special version	Stainless steel pinion, Actuator ATEX II 2G/D c T6, Ambient temperatures $-40 \dots +85^\circ\text{C}$ or rather $-20 \dots +150^\circ\text{C}$ on request
Accessories	assembled manual, pneumatic or electric control valve electrical end position feedback, Positioner in I/P or P/P version Adjustment of the switching speed
Ordering note	When ordering, please also specify pilot pressure, operating medium, operating pressure and operating temperature.
Application note	The pressure and temperature specifications are maximum values for normal conditions, for lubricating or non-degreasing media. Degreasing media in particular reduce the specified values and increase the required torque. For these special cases, we recommend prior consultation. When selecting the valve, the lowest control pressure occurring in the system must be taken as the basis.

Dimensions

Ball valves with double-acting rotary actuator

Connection A	Nominal size DN[mm]	max. operating pressure [bar]	B	C	D	E	F	G	Actuator type	Kv value [m ³ /h]	Weight [approx. kg]	Type

For ATEX versions, the type is suffixed with -A at the end.

*With the suffix B, the ball valves are equipped with the PAD052 actuator. When using limit switch boxes and NAMUR control valves, B types must be used. For ATEX versions, the suffix B is replaced by AB.

Ball valves with single-acting rotary actuator

Single-acting actuators are supplied spring-closing (NC) unless otherwise ordered.

For ATEX versions, the type is suffixed with -A at the end.
